

Nutanix® on OVHcloud®

Nutanix on OVHcloud transforms virtualization with a unified hyperconverged platform that makes hybrid multi-cloud faster and simpler. With 147 Nutanix-qualified OVHcloud servers to choose from, you can tailor performance, cost, and capacity to your workload needs.

All-in-one scalable platform built on dedicated next-generation hardware

Cost-Efficient and Predictable Cloud

Save with an excellent price to performance ratio—no hidden fees, no ingress or egress charges, or API fees.

Freedom From Cloud Lock-In

Embrace open standards with no cloud vendor lock-in, for hybrid and multi-cloud deployments.

Tailored to Your Workloads

Choose from a wide range of Nutanix-qualified dedicated servers based on your unique business needs.

Flexible Licensing

Get Nutanix Cloud Platform (NCP) licenses from OVHcloud or bring your own.

No New Skills to Manage

Continue using the same Prism Central experience in the cloud.

Fast Deployment and Flexible Scaling

Ramp up quickly with pre-deployed clusters and automated scale-in and scale-out.

Choose your solution

Packaged Service

- All-in-one private cloud platform
- Three options: Starter, Pro or Ultimate packs
- Pre-installed NCP software licenses
- Ready-to-use Nutanix cluster

BYOL Service (Bring Your Own License)

- Full portability for existing NCP licenses
- Migration to Nutanix-qualified servers
- Pre-deployed quickly

Widest range of Nutanix-qualified servers on the market with 147 variations

Cores	16	←→	48
Memory	128Gbps	←→	1.5Tbps
Stores	7.68Tbps	←→	92.16Tbps
Ingress/Egress	Up to 50Gbps unmetered		

	Azure	AWS	OVHcloud
Number of Configurations	3	9	147
Egress Traffic at 50TB of Data	\$4350	\$4500	Free
Entry Level Price (Per Node with License)	\$6290	\$5055	\$1140
Service Level Agreement (SLA)	99.9%	99.5%	99.95%

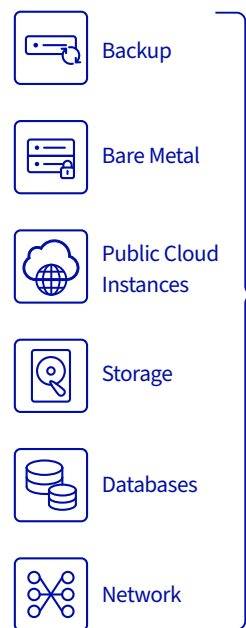

When to consider Nutanix on OVHcloud US

- Shifting to predictable costs
- Replacing outdated or inadequate infrastructure or IT
- Addressing scalability or performance issues
- Migrating workloads to the cloud
- Supporting bursting during peak periods
- Optimizing storage or right-sizing clusters to match workloads
- Moving spend from CapEx to OpEx

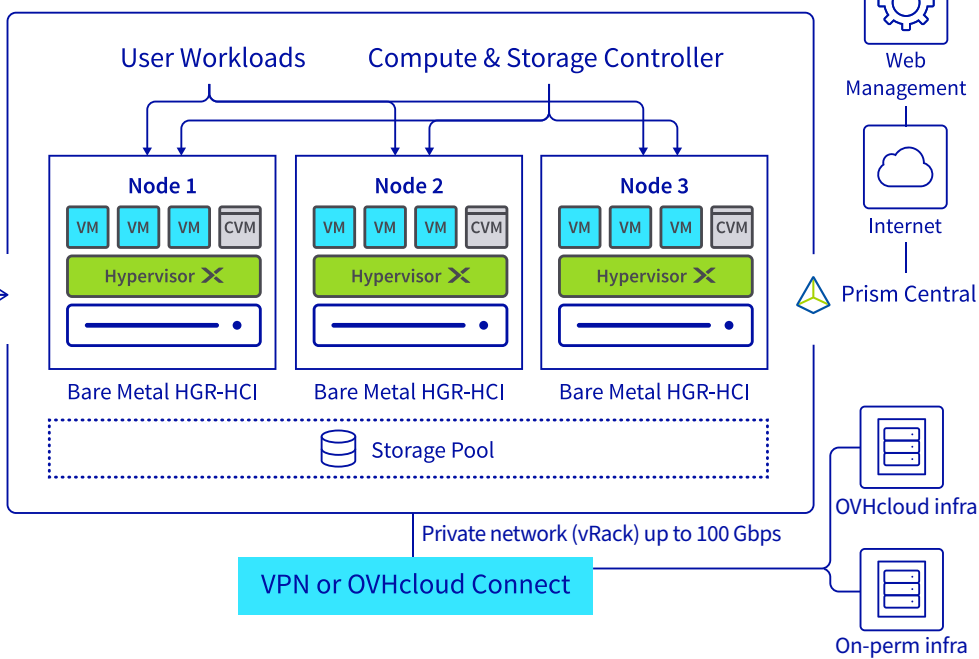

A smarter way to run hybrid multi-cloud

As a Nutanix Champion Service Provider, OVHcloud delivers a full-service cloud infrastructure on Nutanix-ready hardware, connected through vRack, OVHcloud’s private network, to securely run and scale hybrid multi-cloud workloads.

OVHcloud products

Nutanix cluster architecture

Use cases

Move to Cloud

Move applications to the cloud with no code change

Disaster Recovery Plan (DRP)

Quickly build cost-effective secondary site or on-demand disaster recovery environments with predictable performance and no egress fees

On-demand Elasticity

Rapidly burst into the cloud for quick ramp and seasonal demand

Get started

OVHcloud is a cloud provider offering Dedicated Servers, Hosted Private Cloud, and OpenStack-based Public Cloud to over 1.6 million customers worldwide. We have been an innovator in data center design and management for nearly two decades.
